RECORDLY

A working data catalogue with named owners, built by your own team's tools and kept by your own maintainers

See one domain catalogued first. Pay only if you accept it. Capped at €10,120 (excl. VAT). Nothing payable at kickoff. No contractual deviations.

Proposal to Samuli Vainio, Head of Data Platform · Recordly Oy · Helsinki

Solution: Snowflake's built-in metadata and lineage, no bespoke services

PART	HOW
Catalogue	Snowflake object tags and comments on your Data Vault 2.0 hubs, links and satellites (AWS account unchanged). Tags carry domain, owner, steward, sensitivity.
Lineage	Snowflake's built-in lineage and the ACCESS_HISTORY and OBJECT_DEPENDENCIES views, plus ERP source and BI report mapping in your existing BI tool
Ownership model	**Named data owner and named steward per domain** (passenger, freight, then ERP-linked shared data). VR names them; we run the workshops in Finnish and write the RACI.
Change path	Every tag and comment goes to your repository as a **pull request** that your crew approves. No automation writes directly.
Out of scope	Bespoke metadata services, new catalogue platforms, ML, anything touching rail operations systems

> A previous initiative spent months on custom services. Here: **zero custom code to maintain**.

What we read between the lines, and our safeguard

YOUR HISTORY	OUR SAFEGUARD
Engineers tied up for months writing metadata services	Only Snowflake features and tools you already run. If a gap appears, it is listed and **you decide**; we build nothing without your approval.
Contractors rolled off, maintainers scrambled	**Your maintainers own the catalogue from week 1:** they hold the repository and approve every PR. Runbooks in Finnish, written together with them.
No proof it works at handover	**Handover test:** your maintainer adds a new table, tags it, traces its lineage and fixes a broken tag alone, with us watching. Paid only if it passes.
Operational stability	Metadata only; no production data pipeline changes. Nothing is merged in your morning reporting peak.
Foreign-led workshops lost rail concepts	Native Finnish engineer, workshops and documentation in Finnish

Delivery plan: one domain at a time, each accepted before the next

STEP	WORK	YOU ACCEPT
Working sample (3 days)	Passenger domain catalogued: tags, lineage view, named owner and steward, Finnish runbook draft	**A1:** sample reviewed by your team
Freight domain (3 days)	Same pattern, reused. Owners and stewards named.	**A2**
ERP-linked shared data (3 days)	ERP source and BI report lineage, ownership for shared assets	**A3**
Handover test (2 days)	Finnish runbooks final, maintainer test, ownership forum routine	**A4:** test passed

- **Interview stage:** we can show the sample approach live in the interview.
- **Unknown:** your Snowflake edition decides how much lineage is built in. We check in week 1; if a feature is missing, we show the simple fallback (tags plus dependency views) before any work is paid.
- Knowledge transfer from week 1: pairing, all work in your repositories. No Q1 production changes by us.

Team: available at signature, on site in Helsinki

ROLE	CERTIFICATIONS	LANGUAGES	DAYS
Jari Lehtonen, senior analytics engineer	SnowPro Advanced: Data Engineer · AWS Data Engineer Associate · dbt Analytics Engineering	fi (native), en	9
Data governance lead, rail-operations literate	SnowPro Core · DAMA CDMP	fi, en	2

- Majority of the team available from contract signature. On site in Helsinki when workshops need it.
- You may require replacement of any consultant; we overlap at our cost.
- All documentation and runbooks in Finnish.

Price and terms: one cap, pay per accepted domain

ITEM	BASIS	AMOUNT
Working sample: passenger domain (3 days × €920). **Payable only if you accept it**		€2,760
Freight domain (3 days × €920), payable on acceptance		€2,760
ERP-linked shared data (3 days × €920), payable on acceptance		€2,760
Handover test and Finnish runbooks (2 days × €920), payable when the test passes		€1,840
Cap	11 days	**€10,120 excl. VAT**

- **Nothing at kickoff, no lump sum.** Each item is invoiced only after you accept it. Stop after any step and pay only for what you accepted.
- No licences or tools to buy: Snowflake features you already have.
- Offer stands for direct award or competitive tendering.
- **No contractual deviations.** Your standard terms apply as they are.
