RECORDLY

Snowflake FinOps pilot for one member bank

Cost governance on Snowflake and Power BI, compliant with FIN-FSA, EBA and DORA. Delivered in Finnish and Swedish. Everything runs inside your own Azure and Snowflake environment.

Draft proposal to Rasmus Lindqvist, Head of Data and Analytics · Recordly Oy · Helsinki

The proposal in one page

Definition (3 weeks)	Pilot baseline for one member bank and account; ten prioritised cost objects; governance model
Delivery (2 months)	Cleanup: warehouse sizing, auto-suspend, unused objects, query and dbt model optimisation, Power BI refresh tuning, tagging and chargeback
Ongoing (3 months)	Recordly **Virtual Data Engineer in run mode**: 24/7 cost and performance monitoring inside your Snowflake account. **Your team approves every change.**
Price	**€59,440 total** (breakdown on slide 6)
Team	**Proposed FinOps lead** (FinOps lead with banking experience required), **Proposed data engineer** (Snowflake on Azure) and **Proposed DORA advisor** (DORA advisor). **Finnish and Swedish are role requirements; candidate evidence is pending**.

Compliance and governance

REQUIREMENT	HOW WE MEET IT
DORA	Change control through pull requests with human approval; audit trail of every agent action (auditor agent); exit plan, since everything stays in your repositories
FIN-FSA / EBA outsourcing	Recordly as an ICT third party: information for your register of information, audit and access rights, no subcontractors
Non-European AI toolchains	**The VDE runs inside your Snowflake account**, in your Azure region, using Snowflake's own AI services on your credits. Data isn't copied to Recordly systems.
Member banks	Pilot reports for one member bank in Finnish and Swedish; wider rollout scoped separately

How the cost cleanup works

STEP	ACTION	TYPICAL SAVINGS LEVERS
Baseline	Credits by warehouse, user, dbt model and Power BI dataset; tag coverage	Visibility first
Quick fixes	Right-size warehouses, auto-suspend, resource monitors, remove unused tables and clones	Idle compute, storage
Optimise	Rewrite the most expensive queries and dbt models; incremental models; Power BI refresh schedules	Compute per report
Govern	Budgets and alerts per member bank, tagging policy, monthly FinOps review	No relapse
Run	The VDE watches cost and performance daily and opens PRs for fixes; **your team approves**	Continuous

> Honest unknown: the savings potential is quantified in Definition, from your real consumption data. We don't promise a percentage before we've seen it.

Company, team and AI in our delivery

REQUIRED PROFILES; CANDIDATE EVIDENCE PENDING

- Helsinki-based data and AI consultancy; financial statements and credit rating provided with the final offer; **no subcontractors**
- **Proposed FinOps lead**, FinOps lead with banking experience required: FinOps Certified Practitioner, SnowPro Core; fi, sv, en
- **Proposed data engineer**, data engineer, Snowflake on Azure: SnowPro Core, Azure DE Associate; sv, fi, en
- **Proposed DORA advisor**, regulatory and DORA advisor: CISA; fi, sv, en

AI-DRIVEN DELIVERY: MEASURED RESULTS

- Virtual Data Engineer, real projects: a semi-complex pipeline built, tested and validated in **30 min instead of 12 h**
- Migration to dbt + Snowflake: **about 30 credits per migrated table**, a predictable cost
- Business questions answered by the agent: **developer context switches per day went to zero**
- Cost and performance optimisation is a standard VDE task

Preliminary pricing: definition, delivery, ongoing

PHASE	EFFORT	PRICE
Definition	4 FinOps days × €1,000 + 3 DE days × €920 + 1 advisor day × €1,200	€7,960
Delivery	6 FinOps days × €1,000 + 6 DE days × €920 + 8 AI architect days × €960 + 2 advisor days × €1,200	€21,600
Ongoing (3 months)	VDE 3 × €9,000 + 3 AI architect days × €960	€29,880
Total		**€59,440 (excl. VAT)**

- You may stop after Definition with no further commitment.
- Snowflake AI credits used by the agents are billed on your account and reported monthly.
- Standard terms accepted; scope, staffing and commercial terms require owner confirmation.

Staffing, scope and price assumptions

- Eight hours/day. Proposed rates: FinOps lead EUR 125/h, DE EUR 115/h, AI DE EUR 120/h, DORA advisor EUR 150/h, AI architect EUR 120/h. Non-DE rates are commercial proposals for owner review. AI rates include EUR 5/h premium.
- Delivery includes 8 AI architect days for VDE setup and 6 DE days of cleanup. In run mode the client approves every change; Recordly provides 1 architect day/month.
- This reduced 30-day build estimate covers a **pilot in one member bank and one Snowflake account, with ten prioritised cost objects**. Wider rollout is estimated after definition; it is not included in this price. Confirm dbt readiness before VDE deployment.
- CVs, banking experience, certifications, languages and actual availability remain unverified. Nominate the run architect and verify all profiles before submission.
- The fixed phase fees cover the specified scope and capacity. Agree acceptance criteria and source-access assumptions before commitment; customer AI credits, licences and travel are excluded.
