RECORDLY

AI readiness assessed in four weeks, with the business case validated on your data

A 90-day action roadmap on SAP, Azure and Snowflake + dbt. Fixed €16,760 excl. VAT. Standard terms.

Proposal to Mikael Salmela, Director of Enterprise Data Platforms · Recordly Oy · Helsinki

Solution: short, evidence-first, no multi-year theory

WHAT YOU GET IN 4 WEEKS

- **AI readiness assessment** of SAP, Azure and Snowflake + dbt: data quality, governance, skills
- **3-5 prioritised use cases** across grocery, building and technical trade, and car trade, each with a **margin-uplift estimate validated on your Snowflake data**, not on assumptions
- **Architecture enhancements** and **required capabilities**, only what the use cases need
- **90-day action roadmap** that the steering committee can approve in one sitting

OUT OF SCOPE

- Multi-year transformation plans
- Building or buying AI platforms
- New licences or tools
- Production builds (separate decision)

Your concerns, our answers

YOUR CONCERN	OUR ANSWER
Fee above sanctioned platform budget	Scope fitted to **18 days**, one fixed total, no options
Drawn-out advisory roadmap, scrutiny from divisions	**4 weeks**; every use case carries a number from your own data by week 3
Compliance exposure	Work inside Kesko's tenant; no data leaves; access and security checklist as a gate before week 1 analysis
Defending the team's footprint	Your engineers co-own every finding; nothing to "hand over"

Plan: four weeks, two on-site days every week

WEEK	WORK	GATE
1	Interviews, SAP and Snowflake data probe	Honest unknown: data quality per business area; **go/no-go on use cases that lack data**
2	Long-list scored on value, data readiness, effort	Steering-ready shortlist
3	Validate top 3 on Snowflake data; architecture and capability gaps	Numbers per use case
4	90-day roadmap, steering committee pack	Acceptance

On site at Helsinki office at least 2 days every week. Written updates, no recurring status meetings.

Team and references

ROLE	EXPERIENCE, CERTIFICATIONS	AVAILABILITY
Senior Data and AI Architect (lead)	14 yrs; SnowPro Advanced: Architect, Azure Solutions Architect Expert	from contract signature
Senior AI/ML Engineer	9 yrs; Azure AI Engineer Associate, Azure Data Scientist Associate	from contract signature
Senior Data Engineer	8 yrs; SnowPro Core, dbt Analytics Engineering	from contract signature
