RECORDLY

EU AI Act readiness, paced by what discovery finds

A fixed discovery, then a capped phase you steer. Ceiling €24,840 excl. VAT, prices firm 9 months.

Proposal to Tarja Lindroos, Director of Data and Reporting · Recordly Oy · Helsinki

Recommended solution: inventory, classify, govern, hand over

STEP	WHAT YOU GET
Model inventory	Every model and AI-assisted process in reporting and wealth/insurance operations, with owner, data used, purpose
EU AI Act classification	Each item classed (prohibited, high-risk, limited, minimal) with the reasoning written down
Risk-mitigation procedures	Roles, approval steps, monitoring and incident handling, integrated with your current data setup
Handover to your AMS partner	Runbooks and ownership map, in Finnish, so your internal team and the AMS own it permanently

All workshops and documentation in Finnish. Built on your existing public cloud setup, no new licences.

Why it is not a rigid lump sum

You told us discovery pilots stall when data quirks meet locked scope. We priced for that.

YOUR CONCERN	OUR ANSWER
Unmapped data quirks surface mid-way	**Discovery is separate and fixed.** Phase 2 is sized only after it
Locked-in scope collides with reality	Phase 2 is **billed on actual days, capped**. At the gate you choose: narrow, swap or extend
Work halts at procurement	Any extension is yours to approve; we never stop silently
Ownership after we leave	Your team co-writes every document; AMS partner joins at the handover workshop

> Unknown: model count and data quality. Discovery counts them in two weeks; the gate resets Phase 2.

Execution plan

PHASE	DAYS	WORK	GATE
1 Discovery (fixed)	10	Interviews, model inventory, first classification, data quirks list	You approve Phase 2 scope and cap
2 Framework (capped)	up to 14	Governance roles, risk procedures, integration with data setup, AMS handover	You accept deliverables
3 Hypercare (capped)	up to 3	Two weeks of questions and fixes after rollout	Handover to AMS

Pairing with your team from week 1. Short status every two weeks.

Delivery team: available from contract signature

	SENIOR DATA ARCHITECT	SENIOR DATA ENGINEER
Experience	12 years, data governance and regulated reporting	9 years, data pipelines, lineage, model/data inventories
Certifications	TOGAF 9 Certified · CDMP Practitioner (DAMA)	Azure Data Engineer Associate · Databricks Data Engineer Associate
Languages	Finnish (native), English	Finnish (native), English
Availability	From contract signature	From contract signature

You may replace either person at any time; replacement of equal seniority, overlap at our cost.

Price: fixed discovery plus capped phase

PART	DAYS × RATE	AMOUNT
Discovery, fixed	10 × €920	€9,200
Framework and hypercare, capped, billed on actual days	up to 17 × €920	up to €15,640
Maximum total, excl. VAT	**27 days**	**€24,840**

- Unused capped days are not invoiced. Invoicing monthly on actual days.
- Not included: model remediation, legal opinion on classifications
- Prices firm and binding for 9 months. Your standard agreement, **no contractual deviations**.
