RECORDLY

Real-Time Event Ingestion Pipeline for Logistics Data Platform

A preliminary proposal from Recordly: three scope options, so we can size the work to your budget before the full offer

Preliminary proposal to Sanni Vainio, Head of Data Platforms · Recordly Oy · Helsinki

What we will deliver

- **Event-streaming design bridging AWS and Azure into Databricks Lakehouse and Lakebase**
- **Resilience: replay, dead-letter handling, monitoring, failover tested**
- **SAP S/4HANA integration readiness and BI-ready tracking tables**
- Senior team, all workshops and documentation in Finnish, available from contract signature
- Built on your existing stack, with no new licences unless you choose them

Three options, priced transparently

OPTION	EFFORT	SCOPE	FIXED PRICE (EXCL. VAT)
Focused	15 person-days × €920	Event-streaming design bridging AWS and Azure into Databricks Lakehouse and Lakebase	€13,800
Core	30 person-days × €920	Event-streaming design bridging AWS and Azure into Databricks Lakehouse and Lakebase; Resilience: replay, dead-letter handling, monitoring, failover tested	€27,600
Full	55 person-days × €920	Event-streaming design bridging AWS and Azure into Databricks Lakehouse and Lakebase; Resilience: replay, dead-letter handling, monitoring, failover tested; SAP S/4HANA integration readiness and BI-ready tracking tables	€50,600

Rates: senior data engineer / architect €920 per day. Fixed price per option; any effort above plan is Recordly's risk.

Which option fits your budget?

Tell us which option fits your approved budget, or the range you're working with, and we'll return a full proposal sized exactly to it. Three comparable references with contact persons for shortlisted bidders.
